rebutia chrysacantha var elegans Ilifle

June 3rd, 2020 - description *rebutia chrysacantha* var *elegans* is a local or morphological form of the very variable *rebutia minuscula* it distinguishes from standard *rebutia chrysacantha* for having rather short bristly whitish spines rather than yellowish and stiff and very showy large reddish orange flowers the name is derived from the overall appearance of the variety with elegant neat spines'

'molecular phylogenetic relationships of the springerlink

March 23rd, 2020 - the andes represent a hotspot of diversity within cactaceae owing to its small globular growth and its diverse flower colours the andean genus aylostera speng has drawn the attention of many cactus enthusiasts based on molecular data the genus was recently split from reboutia s l in contrast to the large number of taxa described within aylostera a comprehensive phylogenetic reconstruction"das groe kakteen lexikon download only books
