'Modulation of astrocyte reactivity improves functional

April 29th, 2020 - Astrocyte reactivity and neuroinflammation are hallmarks of CNS pathological conditions such as Alzheimer's disease. However, the specific role of reactive astrocytes is still debated. This controversy may stem from the fact that most strategies used to modulate astrocyte reactivity and explore its contribution to disease outcomes have only limited specificity. Moreover, reactive astrocytes"

April 23rd, 2020 - et maintenant c'est une ville presque neuve. L'après la guerre, il n'y avait ni rues ni maisons. Il y avait des meubles neufs. La ville embellit chaque année. Une large rue mène de la gare au centre de la ville. Sur la grande place, il y a un bel édifice tout blanc, c'est la poste centrale et c'est le cinéma nouveau.'

April 26th, 2020 - Beneficial microbes in the microbiome of plant roots improve plant health. Induced systemic resistance (ISR) emerged as an important mechanism by which selected plant growth-promoting bacteria and fungi in the rhizosphere prime the whole plant body for enhanced defense against a broad range of pathogens and insect herbivores. A wide variety of root-associated mutualists including arbuscular mycorrhizal fungi and rhizobacteria are involved in ISR. Chamilo portals around the world
